

MAG TOUCH

Guard Monitoring Solutions

Reliability and Strength

Maintenance Monitoring

By mounting ID buttons to any object, you can obtain immediate reports of what has been checked, on which day and at what time. Furthermore, such reports are useful for the purpose of asset and inventory recording and management. Updating of asset registers becomes a quick and effortless task.

Now ID point holders are available in a **variety** of colours including **glow in the dark**

Simple Guard Monitoring

Are your guards doing what you pay them to do? Magtouch systems helps you control and monitor your security, safety and maintenance routines. Effective patrolling ensures maximum protection of your assets, by maintaining full coverage of your site with a visual security guard profile. Disputes with regard to patrol shortcomings are easily identified and resolved.

Time and Attendance Systems

Magtouch provides you with an inexpensive portable Time and Attendance system for use in remote areas such as construction sites etc. ID Buttons on your personal ID cards or badges will record start and finish times at work.

High Quality

We offer a 1 year warranty. Our batons are made from high quality stainless steel and are waterproof so that they can take all the knocks a guard can put them through. The high capacity battery has a lifetime of up to eight years and can be replaced under a standard service charge.
